Virgilia capensis

***Eucalyptus caesia*
 'Silver Princess'**

Weeping white-coated branches carry a profusion of large pink/red flowers in Winter and Spring. The juvenile leaves are rounded and mature leaves are long and slender. It has an open habit therefore unsuitable as a dense shade tree.

H 7m x 1.5m

***Agonis flexuosa* 'Willow Peppermint'**

An evergreen tree that can grow up to 12m in it's ideal conditions. It has an attractive weeping habit and it's leaves have a faint peppermint aroma if crushed. Racemes of white flowers appear in spring. An Australian plant that requires protection from frost while young.

H 6-12m x 4-8m

***Eucalyptus erythrocorys* 'Red Cap Gum'**

A spectacular flowering Eucalypt. Bright yellow flowers and red bud caps look beautiful against the green foliage. Flowers appear from February to April. It has generally smooth bark while the odd rough patch on the trunk. A popular street tree.
 H 5m x 4m

Eucalyptus erythrocorys

TREES

Tipuana tipu 'Pride of Bolivia'

A fast growing, semi-evergreen tree with compound leaflets. A brilliant display of bright yellow flowers appear in late summer. Pruning while young to help encourage good structure is beneficial.
H 20m W 12m

Tipuana tipu

Fraxinus griffithii

Fraxinus griffithii 'Flowering Ash'

A fast growing, small tree to 7m. White flowers in spring are followed by decorative, large seed clusters. A great shade tree for parks and large gardens.
H 7m W 3m

Melaleuca linariifolia 'Snow in Summer'

A bushy tree to 10m with a decorative, paperbark trunk. A beautiful mass of creamy-white flowers look spectacularly in summer. A fast growing tree ideal for screens & windbreaks.
H 6-10m W 3-8m

Eucalyptus forrestiana

Eucalyptus forrestiana 'Fuchsia Gum'

An ornamental, small tree to 7m with smooth, brown bark. Orange/red, pendulous buds with yellow flowers hang in mass amongst the leaves in summer. A popular choice for parks, roadside plantings and windbreaks. Also useful to control wind erosion.
H 3-7m W 3-5m
