## HEDGING PLANTS

### **NANDINA BLUSH™ (b)**

Compact shrub with bubbly red blushing leaves for nine months of the year with main flush in Winter. Plant in full sun to part shade. Will tolerate heavier soils with reasonable drainage. Low water requirements. Water during extended dry periods.  
H 60-70cm W 60m

### **SYZYGIIUM australe BUSH CHRISTMAS (b)**

Bushy shrub with a compact habit that can be trimmed into a dense hedge or topiary. Bronze new growth in Winter. Has edible pink berries. Position in full sun to part shade in well draining moist soil.  
H 2-3m W 1.5m Can be pruned much smaller

### **RHAPHIOLEPIS SNOW MAIDEN**

Dwarf compact shrub which is excellent for low hedges. Clusters of white flowers appear in Winter and Spring. Slower growing, low maintenance plant. Tolerates a wide range of soil types. Low water requirements once established.  
H 75cm W 50cm

### **VIBURNUM TINUS**

Rounded evergreen shrub with dark green oval leaves. Clusters of tiny white flowers appear in late Winter, early Spring followed by blue-black berries. Tolerant of a wide range of soils and conditions. Plant in full sun to part shade. Moderately frost hardy.  
H 3m W 3m

### **SYZYGIIUM ORANGE TWIST (b)**

Dense shrub with small glossy dark green leaves that has contrasting vivid orange new growth. Prune to maintain hedge shape and encourage colourful new growth. Has edible magenta berries. Position in full sun to part shade in well draining moist soil.  
H to 3m W to 1.5m

### **VIBURNUM DENSE FENCE™ (b)**

Dense shrub that will form a 2 metre screen in 14 months when fertilised correctly. Bronze new growth. Prefers well drained soil types. Plant in full sun or part shade. Moderate watering required.  
H 2.5-3m W 2m Unpruned  
H 1.8m when pruned
